

**DOUBLELATCH™ BRIDGE SYSTEM**  
THE EVOLUTION OF ARTHROSCOPIC ACCESS

# DOUBLELATCH™ BRIDGE SYSTEM

## THE EVOLUTION OF ARTHROSCOPIC ACCESS

ConMed Linvatec brings another first to market with the DoubleLatch Bridge System™. The DoubleLatch Bridge System is a reusable instrument system for use in arthroscopy procedures. It is intended to be used for access into the joint capsule for the facilitation of visualization and instrument use through multiple portals. This next step in ConMed Linvatecs Quicklatch® evolution epitomizes simplicity with multiple push and click interfaces.

- Enhanced ergonomics for insertion and removal at the bridge/cannula interface.
- Included is the addition of a replaceable seal to improve fluid retention to maintain joint distention.
- Improved cannula design with included angled valve
- Improved cannula designed with included angled valve

Cat. No.	Description
DL6111	Single Stopcock DoubleLatch™ Bridge
DL6112	Double Stopcock DoubleLatch Bridge
DL5801V	5.8mm DoubleLatch Cannula with Valve
DL5802V	5.8mm DoubleLatch Retaining Cannula with Valve
DL5804	5.8mm DoubleLatch Conical Obturator
DL1008	10 Replacement Seals for DL Cannulas
DL1009	Replacement Cannula Seal Cap
DL1010	Seal Cap Installation and Removal Tool

# DOUBLELATCH™
